

Rain Gauge

Features

- Tipping Spoon Rain Gauge with Self-emptying Bucket
- Dimensions: 6.5 × 10 inches
- Weight: 13.4 ounces
- Accurate to +/- 2%
- Includes: rain cone, bird spikes

To Install The Rain Gauge:

1. Insert a pole in the ground (with a diameter of 1.26" - 1.97" (32-50mm).
2. From the Tipping bucket box, pull the tab, cut the "safety rubber band" and attach the Rain gauge funnel.
3. Attach the Telemetry unit and the Rain gauge to the pole using the hose clamps.
4. Attach the rain gauge cable to the "Pulse" input of the telemetry unit (use A first).
5. Gently guide the cable through the integrated strain reliefs:
 - Connect the brown wire to the input labeled "signal"
 - Connect the white wire to the input labeled "GND"
